

Some DNA Resources

DNA Testing Companies

23and me: <https://www.23andme.com/> (Autosomal testing)

"Find out what your DNA says about you and your family.

Learn what percent of your DNA is from populations around the world

Contact your DNA relatives across continents or across the street

Build your family tree and enhance your experience with relatives"

"I understand I am purchasing ancestry reports and uninterpreted raw genetic data from 23andMe for \$99. I understand I will not receive any reports about my health in the immediate future, and there is no timeline as to which health reports might be available or when they might be available."

Ancestry: http://help.ancestry.com/app/answers/detail/a_id/5442 (Autosomal testing)

What is AncestryDNA?

AncestryDNA is a new DNA testing service that utilizes some of the latest autosomal testing technology to revolutionize the way you discover your family history. This service combines advanced DNA science with the world's largest online family history resource to predict your genetic ethnicity and help you find new family connections. It maps ethnicity going back multiple generations and provides insight into such possibilities as: what region of Europe are my ancestors from, or am I likely to have East Asian heritage? AncestryDNA can also help identify relationships with unknown relatives through a dynamic list of possible DNA member matches.

Familytreedna: <https://www.familytreedna.com/> (Y-DNA, mtDNA and autosomal testing)

Y-DNA testing 37 markers=\$169.

Family Finder testing=\$99 (autosomal)

mtDNA testing=\$199

Genographic Project: <https://genographic.nationalgeographic.com/>

"Since its launch in 2005, National Geographic's Genographic Project has used advanced DNA analysis and worked with indigenous communities to help answer fundamental questions about where humans originated and how we came to populate the Earth. Now, cutting-edge technology is enabling us to shine a powerful new light on our collective past. By participating in the latest phase of this real-time scientific project, you can learn more about yourself than you ever thought possible. You will also help support the Genographic Legacy Fund, which works to conserve and revitalize indigenous cultures around the world."
